Drivebox A1

User Manual

Please read the instruction first

1. This product is designer specifically for cars equipped with original in car systems with wired Apple Carplay functionality.
2. Please check if the original in car system has wired carplay function.
3. Not every car with built-in CarPlay functionality can be compatible with this adapter. If any problems occur during the use of this adapter, please save a log and send it to us.

Method for saving logs

- Insert a blank USB or TF card into the product and connect it to the car's infotainment system via a data cable to reproduce the problem. Remove the USB or TF card and send the contents to the manufacturer, specifying the specific vehicle model and year.

Warning! In order to adapt to the display effect of the vehicle display screen, when the Android system is first connected to the vehicle, the system will automatically restart once to automatically adapt to the resolution of the original in car system display screen.

How to detect the original car system with carplay function

Method 1:

- User Manual: Search for chapters such as Multimedia System, Smartphone Interconnection", or "Apple CarPlay" in the table of contents to see if there are any relevant instructions
- Vehicle documents: Check your purchase contract, configuration sheet, or vehicle conformity certificate, and search for the words "Apple CarPlay" in the "Information Entertainment System" or "In Car Connectivity column

Method 2:

- Prepare an iPhone with iOS 7.1 or higher operating system
- Use Apple original or MFi certified data cables
- Turn the vehicle ignition to the "ON" position or start the engine.

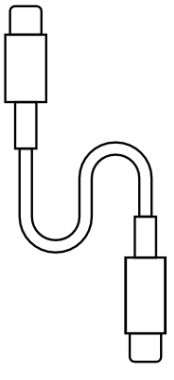

Connection Test

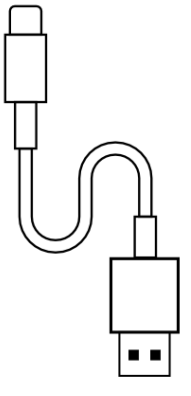

- Insert the data cable into the USB interface on the car's infotainment system (it is recommended to try the interface in the center console or armrest box first)
- Observe whether the CarPlay interface automatically pops up on the central control screen, or whether the "Apple CarPlay" icon appears in the main menu of the screen.
- You can also check on your iPhone by going to "Settings"> "General"> "CarPlay Car" to see if your vehicle name can be found in the list.

Panduan Pengguna

Harap Baca Petunjuk Ini Terlebih Dahulu

1. Produk ini dirancang khusus untuk mobil yang dilengkapi sistem head unit bawaan pabrik dengan fitur Apple CarPlay kabel (wired).
2. Pastikan terlebih dahulu bahwa head unit bawaan mobil Anda memiliki fitur CarPlay kabel.
3. Tidak semua mobil dengan fitur CarPlay bawaan dapat kompatibel dengan adaptor ini. Jika terjadi masalah selama penggunaan adaptor, silakan simpan log dan kirimkan kepada kami.

Cara Menyimpan Log

- Masukkan flashdisk USB atau kartu TF kosong ke dalam produk, lalu hubungkan ke head unit mobil menggunakan kabel data dan ulangi kondisi saat masalah terjadi. Lepaskan flashdisk USB atau kartu TF, lalu kirimkan isinya kepada produsen dengan menyebutkan model dan tahun kendaraan Anda.

Perhatian! Untuk menyesuaikan tampilan dengan layar kendaraan, saat sistem Android pertama kali terhubung ke kendaraan, sistem akan otomatis melakukan restart satu kali untuk menyesuaikan resolusi layar head unit bawaan mobil.

Cara Mengecek Apakah Head Unit Bawaan Mobil Memiliki Fitur CarPlay

Metode 1:

- Buku Manual Kendaraan: Cari bab seperti “Sistem Multimedia”, “Konektivitas Smartphone”, atau “Apple CarPlay” pada daftar isi untuk melihat apakah ada petunjuk terkait.
- Dokumen Kendaraan: Periksa kontrak pembelian, lembar spesifikasi, atau sertifikat kesesuaian kendaraan, lalu cari kata “Apple CarPlay” pada kolom “Sistem Infotainment” atau “Konektivitas Mobil”.

Metode 2:

- Siapkan iPhone dengan sistem operasi iOS 7.1 atau lebih tinggi.
- Gunakan kabel data original Apple atau kabel bersertifikat MFi.
- Putar kunci kontak ke posisi “ON” atau nyalakan mesin.

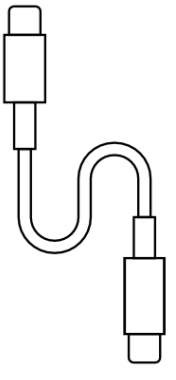

Uji Koneksi

- Colokkan kabel data ke port USB head unit mobil (disarankan mencoba port di konsol tengah atau di dalam armrest terlebih dahulu).
- Perhatikan apakah tampilan CarPlay otomatis muncul di layar head unit, atau apakah ikon “Apple CarPlay” muncul di menu utama layar.
- Anda juga dapat mengecek di iPhone melalui “Pengaturan” > “Umum” > “CarPlay” untuk melihat apakah nama kendaraan Anda ada di daftar.

Pengenalan Produk

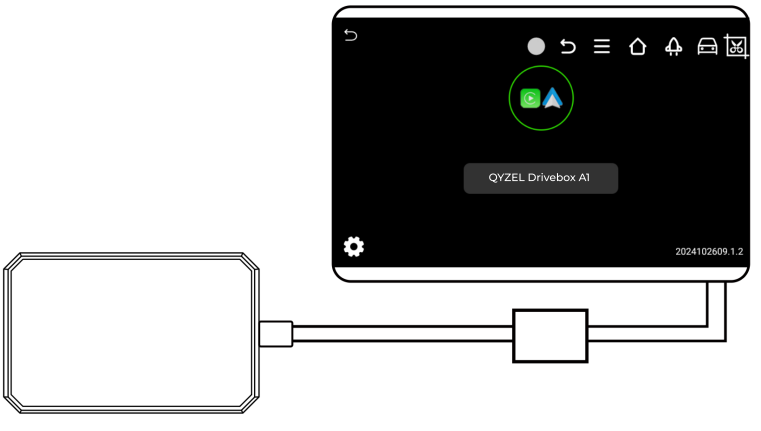

- **System:** Android
- **Function:** Bluetooth, WiFi, Google Store (with a large number of downloadable apps), Google Chrome, Bluetooth, phone, music, video, file management settings
- **Internet:** Wireless Carplay/Android Auto/Airplay/ Android Screen Projection
- **Working temperature:** -20 C~+70 C
- **Power supply:** 5V
- **Stereo:** Supports original car
- **Tepec:** Power input (5V) data transmission
- **Storage:** Sub/TF card supports a maximum of 265GB
- **CPU:** 4 cores
- **Screen resolution:** adaptive original car resolution
- **GPS:** Use the original car GPS device (some models cannot use it and require the original car to come with GPS)

Cara Menghubungkan Produk

- **Langkah 1:** Nyalakan kendaraan hingga dalam kondisi menyala (ON).

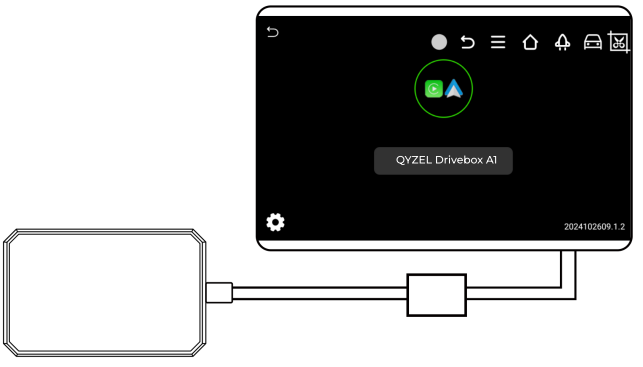

- **Langkah 2:** Hubungkan box ke port data kendaraan (port USB atau Type-C) menggunakan kabel data bawaan adaptor.

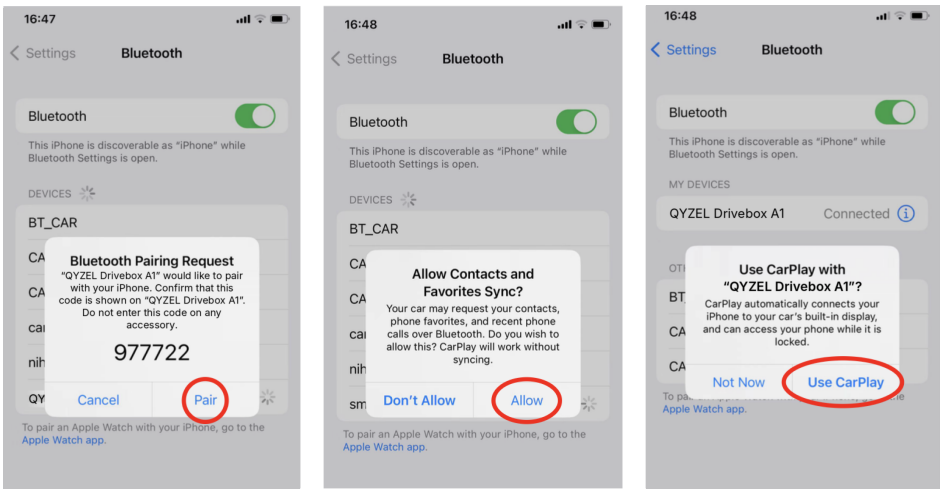

- **Langkah 3:** Layar kendaraan akan menampilkan antarmuka CarPlay dan terhubung secara otomatis (beberapa model memerlukan pemilihan Apple CarPlay secara manual). Pada koneksi pertama, box akan restart untuk menyesuaikan resolusi layar bawaan mobil secara otomatis.

Petunjuk Penggunaan

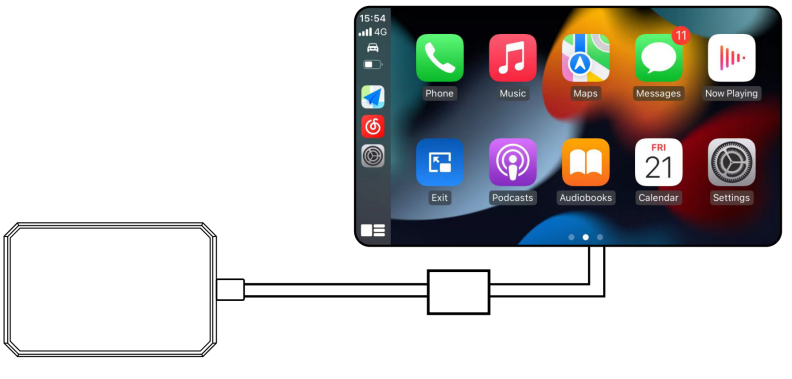

Pengguna iPhone (iOS)

1. Aktifkan Bluetooth di iPhone, cari perangkat Bluetooth bernama “QYZEL DriveBox A1”. Lakukan pairing, izinkan sinkronisasi, lalu ketuk “Gunakan CarPlay”.

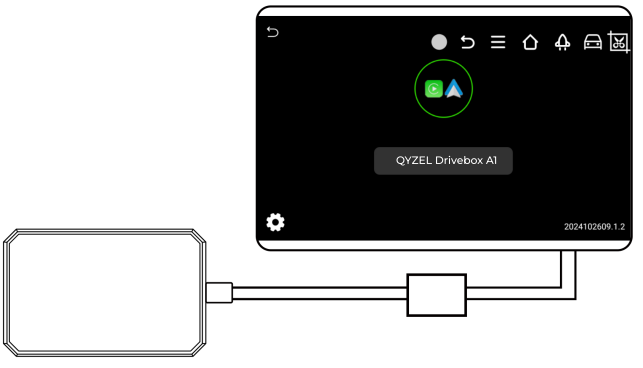

2. Setelah terhubung, tunggu beberapa detik hingga tampilan CarPlay muncul.

Petunjuk Penggunaan

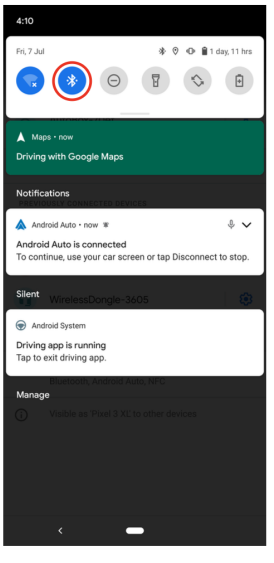

Pengguna Android

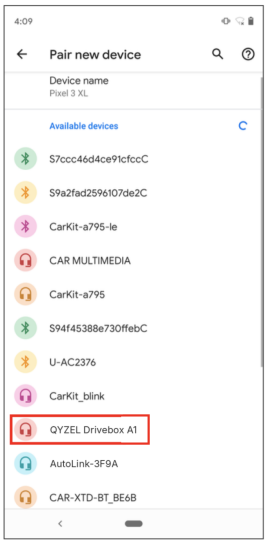

1. Hubungkan box ke port data USB bawaan mobil. Tekan tombol “Auto APP” atau masuk ke halaman Auto, lalu tunggu box membaca data dan terhubung.

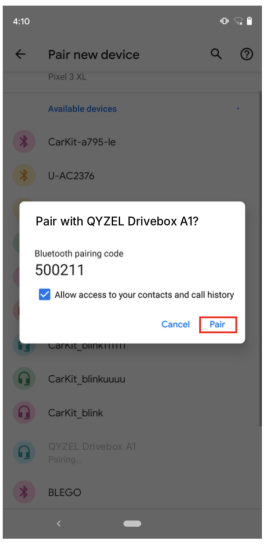

Halaman pengaturan di layar head unit mobil

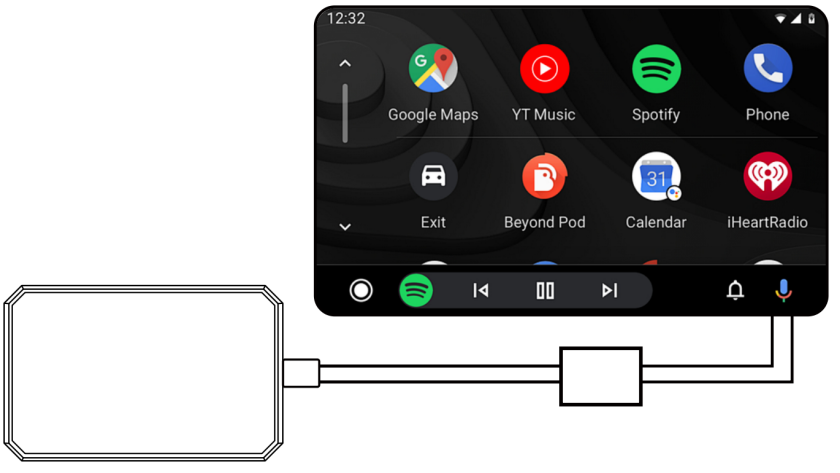

2. Aktifkan Bluetooth di ponsel, cari perangkat Bluetooth bernama “QYZEL DriveBox A1”. Lakukan pairing, lalu tunggu hingga Android Auto menampilkan “Terhubung ke mobil Anda”.

3. Setelah terhubung, tunggu beberapa detik hingga tampilan Android Auto muncul.
